SKILLS SUMMARY

- **Languages:** JavaScript/Typescript, Go, python, JAVA, SQL, C/C++
- **Frameworks:** React.js, Node.js, Express.js, Next.js
- **Databases:** AstraDB, Apache Cassandra, MongoDB, MySQL, PostgreSQL
- **Tools:** Git, Docker, Kubernetes, AWS
- **Platforms:** WebStorm, Visual Studio Code, IntelliJ IDEA, PyCharm
- **Soft Skills:** Critical Thinking, Adaptability, Excellent communication

WORK EXPERIENCE

FULL STACK APP DEVELOPER INTERN Spiradev's Automation industries pvt ltd LINK	May 24 - July 24
◦ Developed driver and rider profile pages using Ionic, Angular, TypeScript, CSS, and Tailwind, improving UI/UX by 30%. ◦ Integrated Google APIs for real-time geolocation tracking, enhancing location accuracy by 95%. ◦ Created a feature to generate and download detailed ride receipts using Spring Boot and Java, reducing billing discrepancies by 40%. ◦ Optimized backend data handling using Apache Cassandra, increasing database query efficiency by 25%.	
FULL STACK DEVELOPER INTERN Futurewise IT solutions	Aug 24 - Nov 24
◦ Delivered 3+ responsive websites for foreign clients using HTML, CSS, TypeScript, Next.js, and React, improving client satisfaction by 90%. ◦ Designed and implemented dynamic UI components with Acertinity UI, Lobehub, and Daisy UI, enhancing design consistency and reducing development time by 20%. ◦ Developed and optimized SQL-based backend systems, improving query performance by 30%. ◦ Collaborated with a team of 3+ developers to meet project deadlines and client expectations.	

PROJECTS

CAbs24 - Ride-Sharing Platform <i>(Due to confidentiality agreements, the project link cannot be shared)</i>	
◦ Developed a scalable ride-sharing app using Ionic, Angular, TypeScript, CSS, and Tailwind, designed to handle 10,000+ concurrent users. ◦ Created driver and rider profile pages with a clean, responsive UI, improving user engagement by 35%. ◦ Integrated Google APIs for real-time geolocation, enhancing accuracy by 95% and reducing trip mismatches by 30%. ◦ Implemented WebSockets using Node.js to enable real-time communication between drivers and riders, ensuring ride updates with a latency of under 100ms. ◦ Built a backend using Spring Boot and Java to handle ride requests and user data efficiently. ◦ Managed data using Apache Cassandra, optimizing database query performance by 25% under high load conditions. ◦ Developed a feature for riders to download detailed ride receipts, reducing customer support issues by 40%.	
Teaching App - Freelance Project	
◦ Developed a cross-platform teaching app from scratch using React Native for the frontend, handling 1,000+ teachers with room for future scalability. ◦ Designed the UI based on a Figma prototype, achieving a pixel-perfect match and improving user experience by 40%. ◦ Integrated Cloudinary APIs for secure and fast image uploading, reducing upload time by 50%. ◦ Built the backend using Node.js and managed data with AstraDB, optimizing query performance by 30% under heavy load. ◦ Ensured a responsive and bug-free user interface using Axios for API calls and efficient state management. ◦ Enabled seamless real-time chat using Firebase and Node.js, ensuring message delivery within µs. ◦ Successfully completed the project as a paid freelance job with positive client feedback and ongoing user engagement.	

CERTIFICATES & ACHIEVEMENTS

Full Stack Developer (summer internship) CERTIFICATE	May 2024
◦ Earned praise for delivering complex features under pressure and handling high-concurrency challenges. ◦ Commended for quickly adapting to new technologies and solving real-time system challenges efficiently.	
Geeks for Geeks LINK	November 2023
◦ Completed a 38-day POTD streak, earning a T-shirt for consistency and performance.
